

How to Enable Auto-Login

When Auto-login feature is enabled, user should be able to close and open i21 without needing to enter their credentials.

Here are the steps on how to enable auto-login feature:

1. Go to i21 site. Login screen will be displayed. The company is already defaulted to the first company in the list
2. Enter the user credentials (**User Name**, **Password** and **Company**)
3. Tick the **Remember Me** check box

4. Click the **Login** button
When a user refreshes the browser or opens another i21 in a tab, login will be skipped.
