

How to Update Origin Companies

1. Log in as **Security** user
[blocked URL](#)
2. On the user's menu panel go to **System Manager** folder then click **Update Origin Companies**

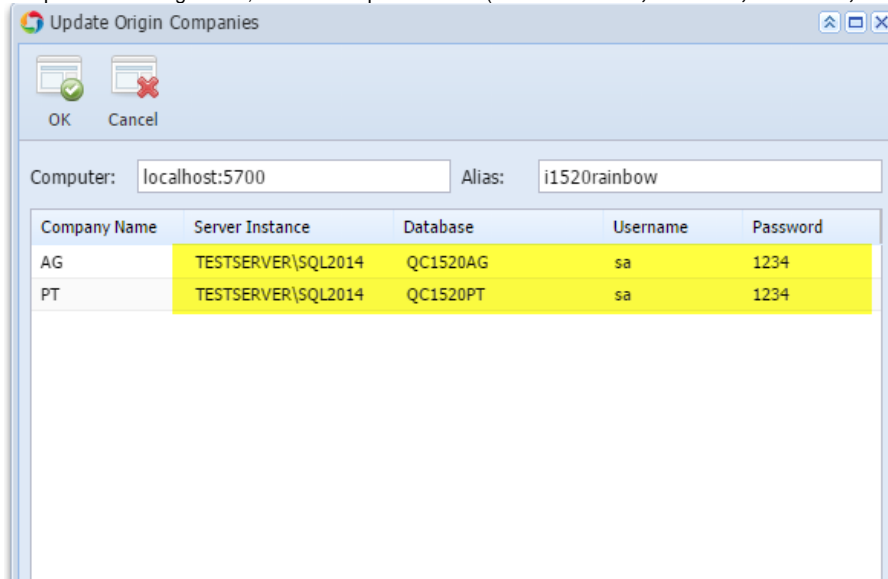

Update Origin Companies

OK Cancel

Computer: localhost:5700 Alias: i1520rainbow

Company Name	Server Instance	Database	Username	Password
AG	TESTSERVER\SQL2012	i1520AG	irely	iRely486
PT	TESTSERVER\SQL2012	i1520PT	irely	iRely486

3. To update the configuration, enter the required details (**Server/Instance, Database, Username, and Password**)

Update Origin Companies

OK Cancel

Computer: localhost:5700 Alias: i1520rainbow

Company Name	Server Instance	Database	Username	Password
AG	TESTSERVER\SQL2014	QC1520AG	sa	1234
PT	TESTSERVER\SQL2014	QC1520PT	sa	1234

4. Click **OK** toolbar button. if configuration is valid, the screen will automatically close.
5. To verify update, check the web configuration on the deployment folder.

```
<?xml version="1.0" encoding="UTF-8"?>
<configuration>
  <connectionStrings>
    <add name="SystemManagerContext" connectionString="Data Source=TESTSERVER\SQL2012;Initial Catalog=User ID=irely;Password=iRely486;MultipleActiveResultSets=True"
      providerName="System.Data.SqlClient" />
    <add name="GlobalConfig08" connectionString="Data Source=TESTSERVER\SQL2014;Initial Catalog=QC1520cfg;User ID=irely;Password=iRely486;MultipleActiveResultSets=True"
      providerName="System.Data.SqlClient" />
    <add name="AG" connectionString="Data Source=TESTSERVER\SQL2014;Initial Catalog=QC1520AG;User ID=sa;Password=1234;MultipleActiveResultSets=True"
      providerName="System.Data.SqlClient" />
    <add name="PT" connectionString="Data Source=TESTSERVER\SQL2014;Initial Catalog=QC1520PT;User ID=sa;Password=1234;MultipleActiveResultSets=True"
      providerName="System.Data.SqlClient" />
  </connectionStrings>
</configuration>
```

1. Log in as **Security** user
[blocked URL](#)

2. Select and double click on **Update Origin Companies** from the menu panel. **Update Origin Companies** screen will open.

Update Origin Companies

OK Cancel

Computer: localhost:5700 Alias: QC1510rainbow

Company Name	Server Instance	Database	Username	Password
AG	TESTSERVER\SQL2012	QC1510AG	irely	iRely486
PT	TESTSERVER\SQL2012	QC1510PT	irely	iRely486

? Ready

3. To update the configuration, enter the required details (**Server/Instance, Database, Username, and Password**)

Update Origin Companies

OK Cancel

Computer: localhost:5700 Alias: i1550rainbow

Company Name	Server Instance	Database	Username	Password
AG	TESTSERVER\SQL2012	i550AG	sa	1234
PT	TESTSERVER\SQL2012	i1550PT	sa	1234

Edited

4. Click **OK** toolbar button. if configuration is valid, the screen will automatically close.
5. To verify update, check the web configuration on System Manager folder.

```
</connectionStrings>
  <add name="SystemManagerContext" connectionString="Data Source=TESTSERVER\SQL2012;Initial Catalog=User
ID=iirely;Password=iRelY486;MultipleActiveResultSets=True"
  providerName="System.Data.SqlClient" />
