

How To Create New Container Types

Here are the steps on how to create New Container Types:

1. From the Logistics > **Container Types**. If there's an existing container type, **Search Container Types** screen will open. Otherwise, **New Container Types** screen will open automatically.
2. If Search Contract Option screen opens, click on **New** button to open blank Contract Option screen.

The screenshot displays the 'Container Types' screen in a software application. On the left, a sidebar menu lists various categories, with 'Logistics' and 'Container Type' highlighted by red boxes. The main window is divided into two panes. The left pane shows a 'New' button (also highlighted with a red box) and a list of existing container types. The right pane contains a form for creating a new container type, with fields for Length, Width, Height, UOM, Net Weight, Empty Container Weight, and Gross Weight. The status bar at the bottom indicates 'Ready' and 'Page 1 of 1'.

3. Enter description for Container Type.
4. Add the container length, width, height and add the UOM also.
5. Click on **Save** button to save the record.
