

Tank Monitor

The **Import Wesroc Tank Monitor Reading** screen is used to import tank monitor readings from Wesroc to i21 Tank Management. The system then updates Tank History, recalculates Burn Rate and DD Between Delivery, and automatically creates a Call Entry.

Field Description

Exception Reports Emailed To - The field is used to enter an email address where the exception report will be sent. This is a required field. User should setup first the email settings in Company Preferences.

Browse - This button lets you select the CSV file to be imported.

Import - This will import the records from the CSV file to Tank Management.
