

PM Put-Away

Overview:

This warehouse operation will be useful to move the full pallet to a warehouse bin location

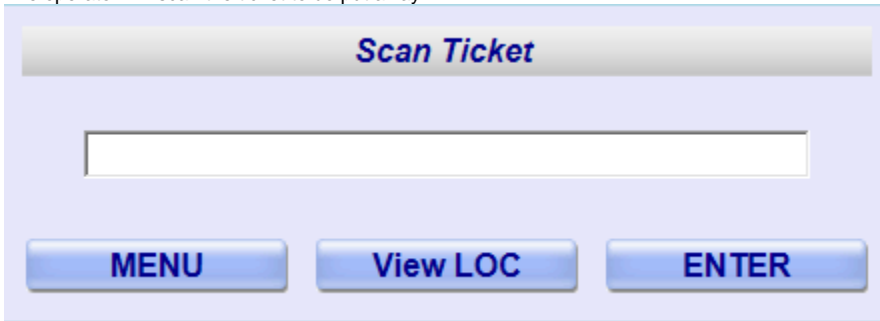

The warehouse operator clicks on the "PUT AWAY" button in his hand held web application as below

Put Away hand held operations:

1. Scan Ticket

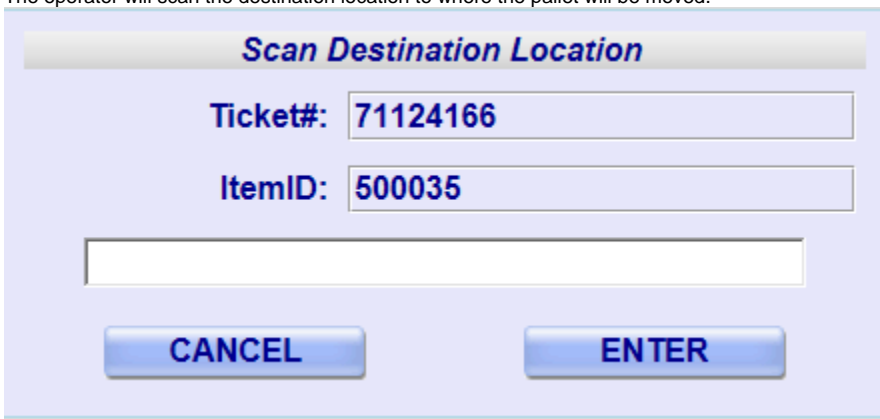

The operator will scan the ticket to do put away

A screenshot of a handheld device screen titled "Scan Ticket". It features a large white rectangular input field for scanning a ticket. Below the input field are three blue buttons: "MENU", "View LOC", and "ENTER".

The operator will click on "Enter" to go to the next screen

2. Scan destination location:

The operator will scan the destination location to where the pallet will be moved.

A screenshot of a handheld device screen titled "Scan Destination Location". It displays two input fields: "Ticket#: 71124166" and "ItemID: 500035". Below these fields is a large white rectangular input field for scanning a destination location. At the bottom are two blue buttons: "CANCEL" and "ENTER".

The operator will click on "Enter" to go to the next screen

3. Confirm move operation

The operator will click on 'Confirm' button to confirm the 'Move'
