

# Complete Sales Order

## Overview:

This warehouse operation adds the lots to the sales order automatically.

But the pre-requisition for this operation is that the sales order should have the staging location and dock door set as part of the sales order

The lots available in the staging location and the dock door will be added to the sales order

The warehouse operator clicks on the "COMPLETE SO" button using handheld web application.

Complete Sales Order hand held operations:

1. Scan the dock door

The operator will scan the dock door which is attached to the sales (also where the lots are staged against the sales order already)

2. Scan/Enter the Trailer #

The operator will scan/enter the trailer number in the following window

The operator will click on "Enter" to go to the next screen

3. Confirm the staging of ticket

The window will display the following which the warehouse operator expected to verify the information physically

- Trailer number
- No. of pallets
- Total Weight

***Touch CONFIRM to Accept***

Dock Door:

dd02

BOLNo:

AA000254

Trailer #:

23424

Pallets:
