Term	Description
From Currency	This is the currency that the transaction is conducted in

To Currency	This the the currency that the customer is converting to.
Rate	This is the exchange rate that is multiplied by the from currency to get equivalency in the to currency
Rate type	This is an identifier that can be applied at the transaction level that allows the customer to maintain multiple rates.
Effective Date	This is the date that the rate will begin to apply to transactions conducted in the to currency. Note that Effective Date is unique per rate type.
Source	This shows if the rate is manually added or imported
Created Date	This shows when the rate was created

On the user's menu panel go to Common Info folder then click Currency Exchange Rates
 Click Insert button or click the blank row on the Currency panel to add a pair of currency exch
