

How Do I find my lot using Inventory View?

Follow the below steps to find a lot in 'Inventory View' scree.

1. Go to Manufacturing—> Inventory View
2. Select the 'Company Location'
3. Now click on the filter button and select 'Lot No.' *Contains* <Enter part of Lot No>
4. Application will filter out the Lot containing the supplied string.

The screenshot shows the 'Inventory View' window with a blue header bar containing menu items: Refresh, Lot Details, Lot History, Lot Adjust, Lot Status Adjust, Lot Expiry Adjust, Lot Move, Lot Merge, Lot Split, Sample Entry, Traceability, Print Label, and Close. Below the header is a 'Details' tab. The main area has a 'Company Location' dropdown set to 'Pinnacle Premix' and a 'Sub Location' dropdown. A 'Filter Records (F3)' button is visible. Below this, a filter bar shows 'Lot No.' selected with a 'Contains' operator and the value '1365' entered. A 'Clear All Filters' button is on the right. The main table displays one record:

Parent Lot No.	Lot No.	Lot Alias	Item No.	Description	Item Category	Sub Location	Storage Location	Qty	UOM	Weight per Unit	Weights per UOM	No. of Packs	Packin	
<input type="checkbox"/>	PLOT-121	LOT-1365	RT-1204D	10053	Ethoxyquin 66%	Raw Tea	STORE	STORE1	4200	pound	60	pound	70	BAG

5. To add more filter option, please click on 'Filter' button and select your search options
