

Lot Quantity Adjust

This option is useful to adjust (increase or reduce) the quantity of a selected lot

While adjusting the user will have to enter a valid reason for adjustment which will help to trace during the audit of the lot

The user will be able to increase the quantity or reduce the quantity up to 0 provided the quantity is either the same or more than the reserved quantity

Quantity can be adjusted both in weight and unit count

"Adjust Quantity" screen can be opened by selecting the Lot and then by "Lot Adjust" menu in Inventory View"
