

Lot Move

Overview: Lot Move screen can be used to move a lot completely or partially from its existing location to a different storage location. If user specified entire lot quantity then lot will be moved to new storage location. If user specifies partial quantity a new lot will be created with the same lot id in destination location.

The source and destination location could be in the same or different factory warehouses

When there is partial quantity to be moved to different location, the system creates new lot but with same lot ID which will make it clear that the same lot is stored in different locations partially

This process creates MOVE and MOVE_CREATE transactions in the current and the new lots respectively

This transaction can be undone from both the lots

"Move Lot" window can be opened by clicking on the menu option "Move Lot"

The screenshot shows a 'Lot Move' window with a toolbar at the top containing 'Save', 'Undo', and 'Close' buttons. The main area contains the following fields:

- Lot No: Lot00344
- Item No: 10033
- Description: Niacin 99%
- Source Sub Location: Raw Ingredients Station
- Source Storage Location: Bin 1
- Quantity: 600.00
- UOM: 50 lb bag
- Number of Packs: 600.00
- Packs UOM: 50 lb bag
- New Sub Location: CA Bin Sub1 (dropdown)
- New Storage Location: CA Bin (dropdown)
- Quantity to Move: (empty)
- UOM: 50 lb bag

The status bar at the bottom shows a help icon, a warning icon, a lightbulb icon, and the text 'Ready'.

Field descriptions:

Field	Description
Lot ID	Lot ID of the selected Lot
Item No	Item associated with Lot
Description	Description of the item
Source Sub Location	Current sub location of Lot
Source Storage Location	Current storage location
