

Truck

In warehouse module, a Truck record is mandatory for creating both, an Inbound and Outbound Order. One Truck record may be associated with one or more orders depending on the direction property of the Truck record. A Truck record with an 'Inbound' direction can be associated with only Inbound orders. Similarly, a Truck record with an 'Outbound' direction can be associated with Outbound orders only.

The Truck manager screen displays all the truck records. User can Create and Modify a Truck from here.

Accessing Truck

- 1.Open the 'iMake' application and enter the login details.
- 2.Select 'Warehouse'.
- 3.In the 'Warehouse' menu, expand 'Truck'.
- 4.Double-click 'Truck'. This opens the screen as shown below:
