

# Traceability

## Overview:

Traceability gives users information about the Forward and Reverse life cycles of a particular Lot.

## Accessing Traceability

1. Open the i21 application and enter the login details.
2. Navigate to Manufacturing --> Traceability. This opens the Traceability screen as shown below

The screenshot shows a web application window titled "Traceability Diagram". At the top, there is a blue header bar with the title and standard window controls (minimize, maximize, close). Below the header, there is a toolbar with "Refresh" and "Close" buttons. The main content area has a tab labeled "Details". Below the tab, there are two dropdown menus: "Lot No:" and "Type:". The "Lot No:" dropdown is currently empty, and the "Type:" dropdown is also empty. Below these dropdowns is a large, empty rectangular area, likely intended for a diagram or data visualization.

3. Select the Lot No from the drop down.
4. Select the Type from the drop down.
5. Click on Refresh button.
