

Lot Item Change

Overview:

This option will be useful to re-designate the material from one to another. Typically this happens when there is a mistake entry of lot material or the quality of the material is not as expected (either better or poor).

When the quality of the lot is not as expected, the lot material is changed to a better quality material or the poor quality material respectively.

Change Lot Material window can be opened by selecting a Lot and then clicking on 'Lot Item Change' button.

Screen shot:

The screenshot shows a software window titled "Lot Item Change" with a menu bar containing "Save", "Undo", and "Close". Below the menu bar is a "Details" tab. The form contains the following fields:

- Lot Number: LOT-1316
- Sub Location: FINISHED GOOD LINE
- Storage Location: WH_STAGING0
- Quantity: 240.00
- UOM: BAG
- Item No: 10053 (with a dropdown arrow)
- Description: Ethoxyquin 66%

The status bar at the bottom indicates "Ready" and "Page 1 of 1".

Fields description:

Field	Description
