

How Line Total is Computed

Line Total is computed as follows.

- 1. If there is no Gross/Net UOM, the Line Total is computed by Receive Qty * Cost.
 - a. Qty to Receive * Cost = Line Total

$100 * 10.00 = 1,000.00$

Items + Insert X Remove Quality View Tax Details Export View Filter (F3)										
Description	Charges Link	Receipt Qty*	Currency Unit	Cost	Cost UOM	Gross/Net	Gross	Net	Line Total	
Test Lotted Item		100 lb	USD	10	lb		0.00	0.00	1,000.00	
		0		0			0.00	0.00	0.00	

- 2. If there is **Gross/Net UOM**, then the system will calculate from Net.
 - a. **Example 1:** Receive UOM and Gross/Net UOM are the same

Cost * Net = Line Total
 $10.00 * 48.00 = 480.00$

Items + Insert X Remove Quality View Tax Details Export View Filter (F3)										
Description	Charges Link	Receipt Qty*	Currency Unit	Cost	Cost UOM	Gross/Net	Gross	Net	Line Total	
Test Lotted Item		100 lb	USD	10	lb	lb	100.00	48	480.00	
		0		0			0.00	0.00	0.00	

- b. **Example 2:** Receive UOM and Gross/Net UOM are different

- 1. Convert Net to Receive UOM Unit Qty to get Qty to Receive by Receipt UOM
 $Net / Receive\ UOM\ Unit\ Qty$
 $1,000\ lb / 10 = 100\ 10\text{-lb}\ bag$

- 2. Multiply result in b.1 with the Cost
 $100 * 100.00 = 10,000.00$
