How to Build the Custom Grid

When a Custom Grid is built, it will be available on the selected screen/module.

- 1. Log in as Admin user
- 2. On user's menu panel, go to System Manager folder then click Custom Grid.
- 3. From Search Custom Grid screen, select an existing record.
- 4. Click Build toolbar button to implement the created field. Check implementation to selected screen/module.

•	Custom Grid - Entity	^ X		
	New Save Search Delete Undo Build Close			
	Details Preview Audit Log (1)			
	Screen Name: Entity Module: Entity Management Description: Custom Grid			

5. Once the Grid has been built, Build column check box will be marked, meaning these controls have been built.

Custom Grid - Entity		^ X	
New Save Search Delete Undo Edit B	uild Close		
Details Preview Audit Log (1)			
Screen Name: Entity M	odule: Entity Management Description: Custom Grie	d	
Tabs Grid Fields			
X Remove △ Up ▽ Down I Layout Q Filter Records (F3)		ls (F3)	
Name	Field Name Field Typ	be Build	
Tab 1	Field 1 Text	\checkmark	
Tab 2	Field 2 Integer		
Tab 3	Field 3 Decimal	\checkmark	
	Field 4 Date		
	Field 5 Bit	\checkmark	
🕐 🗘 💡 🖂 Ready		[4 4 Page <u>1</u> of 1 ▶ ▶]	

(i) Once the record is built, Build toolbar button will become Edit Build. Fields that cannot be edited will be grayed out.

This is an example of a Custom Grid in a screen:
