How to Create Transport Load for Blended Item

To be able to create Transport Load for Blended Item, the following needs to be setup first:

a. Item Setup:

1. From Inventory > Items, create 2 new items as Inventory Item Type and save. Sample below:

New Save Sear Details Setup Item No: Item Type: Short Name: Description: Unit of Measur + Insert X R Unit Gallon	Inch Defeat Undo Duplicate Close Pricing Stock Commodity Act Blend Item 1 Inventory Blend Item 1 Desc e temore Load UOM Here Unit Qay Shert UPC	ivities (0) Atta	achments (0) Aur Manufacturer Status: Commodity Lot Tracking:	dit Log (1) Active Gasoline	* *	Brand Model No:			~

4. Make sure to save the changes on the last item.

b. Recipe Setup:

- 1. From Manufacturing > Recipes, create new recipe.
- 2. Enter Recipe Name, Location, Item (actual item to hold the output ie. Blend Item 3), Quantity and UOM on the header
- On Add Input Item grid, add the 2 inventory items as ingredients and add required quantity and its UOM.
 Set Lower and Upper Tolerance.
- On Add Output Item grid, added item on the header area will show by default.
 Click Save. Sample below:
