

Delete Source

1. From **CRM** module, click **Sources**. Sources screen will appear.

2. To delete Source, select the source to be deleted. Grid row checkbox must be checked.

3. Click **Remove** button. This message will appear:

4. Click **Yes** to proceed.

5. Once the data is removed from the list, click **Save** button to apply changes.

6. If the data you are trying to delete is already used, this message will appear:

iRely i21

The record you are trying to delete is being used.
