

Process Flow to Create Scale Ticket

Here are the pre-requisites in order to create a Scale Ticket:

First, make sure you have to create an Inventory Item and Discount Items that you will be using for Scale setup.

Create Discount Item:

1. From **Inventory > Items**, click **New**.
2. Set the **Item Type** as 'Other Charge'
3. Select the **Commodity** where the Other Charge should be linked. UOM's in the selected Commodity should be populated in Other Charge Item.
4. Select the **Category** for Other Charge.
5. Under **Setup tab > GL Accounts tab**, make sure the required Accounts are added.
6. Under **Setup tab > Location tab**, make sure the Company Locations are added.
7. Under **Setup tab > Cost tab**, configure the Other Charge.
 - a. **Inventory Cost** - enable this checkbox to impact the item in GL Accounts
 - b. **Accrue** - enable this checkbox to accrue the Discount to the Vendor or Third - party Vendor
 - c. **Price** - enable this checkbox if the Discount will be deducted to the Vendor
 - d. **Cost Type** - select Discount if this Other Charge item is for Discount
 - e. **Cost Method** - select an Amount in combobox dropdown
 - f. **Amount** - not required. The Discount Reading from the Scale Ticket will be passed to the created Inventory Receipt / Inventory Shipment
8. Click **Save** toolbar button.

Create Discount Code and Discount Schedule for the Discount Reading in Scale Ticket:

1. Create [Discount Code](#)
2. Create [Discount Table](#) and select the created Discount Code.
3. From **Inventory > Commodities**, select and open the Commodity that is associated to your item.
 - a. Select the created Discount in the **Discount** field.
 - b. Click **Save** toolbar button.

Create Storage Type:

1. From **Ticket Management > Storage Types**, click **New**.
2. Enter the **Storage Type** (Ex. **OP** for Open Storage, **DP** for Delayed Price, **GB** for Grain Bank)
3. Enter the Storage Type **Description**.
4. Select if it is Company or Customer Owned
5. Enable the **Active** checkbox to make it available in the Ticket Pool Distribution Lists.
6. Click **Save** toolbar button.

Create Storage Schedule:

1. From **Ticket Management > Storage Schedule**, click **New**.
2. Enter the **Schedule ID**. This must be a unique ID which accepts 3 characters only.
3. Enter the Storage Schedule **Description**.
4. Select the **Storage Type**. (i.e. the Storage Type you've created)
5. Select the **Commodity** (i.e. the item Commodity)
6. Select the default **Currency**.
7. Select the **Storage Rate** (Ex. Daily or Monthly)
8. Select the **Period Type** (Ex. Thereafter)
9. Enter the **Monthly Rate** (Ex. 0.2)
10. Click **Save** toolbar button.

Scale Ticket Configuration:

1. Install the Scale Device.
2. Install the [Windows Service for Scale](#)
3. Create a [Physical Scale](#). This will be the configuration of your Scale Device that you will be using to get the Gross and Tare Weights of the item.
4. Create a [Grading Equipment](#). This will be the configuration of your Grader machine. Currently, we have not yet implement this to use in Scale Ticket.
5. Create a [Ticket Format](#). The Ticket Format Selection that you will select will be used as default when printing the Scale Ticket. The added Ticket Format should be selected in the Scale Station Settings > Printing tab and set it to Default.
6. Create a [Ticket Pool](#). This will be the configuration of the Ticket Types including the distribution lists that you want to make available upon creating of Scale Ticket.
7. Create a [Scale Station Setting](#). This will be the configuration of your Scale Station upon creating of Scale Ticket. All your setups from Physical Scale, Grading Equipment, Ticket Format and Ticket Pool should be selected/ linked to the Scale Station Setting.

How to create [Scale Ticket](#) after all the pre-requisites are properly setup:

1. From **Ticket Management > Tickets**, click **Station** and the **Scale Station Selection** screen should be opened.
2. Select the default **Scale Station Setting**, the **Scale Ticket Date** and the **Scale Operator**.
3. Click **OK** toolbar button
4. Click **New** toolbar button to begin creating Scale Ticket.
5. Below are the lists of different Ticket Types and Ticket Distributions that you can follow in order to create a Scale Ticket based on your business needs.
 - a. [Open Storage Ticket Distribution - Inbound](#)
 - b. [Open Storage Ticket Distribution - Outbound](#)

- c. Spot Sale Ticket Distribution - Inbound
- d. Spot Sale Ticket Distribution - Outbound
- e. Priced Contract
