

How to Add None column

The **None column** is used to show a blank column in your financial report.

Follow these steps on how to create None column type.

- 1. A new row will be available in the grid section.
- 2. In the **Column Type** field, select None.
- 3. All other fields are not anymore necessary so you can leave those out.

This is how None column will look like when you follow the above steps.
