

Lottery

Lottery screens are used to track, manage and record lottery inventories and sales. This can be accessed by enabling the setting for Lottery Management in System Manager > Company Configuration > Store.

Security Code should be entered by getting the password of the day and **Enable Lottery Management** option should be checked.

The screenshot shows the 'Company Configuration' window with the 'Store' tab selected. The 'Security Code' field is masked with dots, and the 'Enable Lottery Management' checkbox is checked. The left sidebar lists various modules, with 'Store' highlighted. The bottom status bar shows a 'Saved' message.

The message below will be encountered when lottery screens are accessed while Lottery Management is disabled.
