

How to Add Customer Modules

1. Log in as **Admin user**
2. On user's menu panel, go to **System Manager** folder then click **Modules**

3. Click the **Insert** button to add a new blank row at the bottom

4. Enter the **Application Name** and **Module** name

The screenshot shows a window titled "Modules" with a menu bar containing "Save", "Undo", and "Close". Below the menu bar is a "Details" tab. The main area contains a table with two columns: "Application Name" and "Module". The table has a search bar at the top right labeled "Filter Records (F3)". The table contains the following rows:

Application Name	Module
ANY	Any Product
iMake	iMake
iTrade	iTrade
i21	Integration
i21	Meter Billing
Autofueling	Depot
Autofueling	Autofueling
Autofueling	Heating Oil/Warehouse
Autofueling	Web Access
Test	Test Module 1
App A	Mod A
App A	Mod B

The "App A" row with "Mod B" is selected and highlighted in blue. A red rectangle is drawn around this row. The status bar at the bottom shows icons for help, undo, redo, and a "Ready" status.

5. Click the **Save** button.
