

How to Create Fueling Point Price Change

Here are the steps on adding fueling point price change record:

1. Go to **Meter Billing > Fueling Point Price Change** and click **New** button.

The screenshot shows the 'Fueling Point Price Change' window. The 'Details' tab is active. The 'Customer' field is empty, and the 'Date' field is empty. The 'Customer Location' field is empty. Below these fields is a grid with columns: Fueling Point, Product No., Price, and Billed. The grid is currently empty.

2. Select Customer from Customer combo box.
3. Select Customer Location from Customer Location combo box.
4. Enter Date.
5. Enter the grid details. Refer to [Fueling Point Price Change](#) | Field Description | Grid Details to help you in filling out the fields.

The screenshot shows the 'Fueling Point Price Change' window. The 'Details' tab is active. The 'Customer' field is filled with 'Apple Spice Sales', and the 'Date' field is filled with '6/14/2017 10:42 AM'. The 'Customer Location' field is filled with 'Apple Spice Sales'. Below these fields is a grid with columns: Fueling Point, Product No., Price, and Billed. The grid contains one row with the following data: Fueling Point: 0, Product No.: MB-Item 001, Price: 10.00, Billed: 0.00.

6. Click **Save** button.
