

How to Add a License Type

1. Log in as **Admin user**
2. On user's menu panel, go to **System Manager** folder then click **License Types** menu
3. Click the **Insert** button to add a new blank row at the bottom
4. Enter the **Code** and **Description**
5. Check the columns **Required for Application** and **Required for Purchase** if necessary

The screenshot shows a 'License Type' dialog box with a table. The table has four columns: 'Code', 'Description', 'Required for Application', and 'Required for Purchase'. There are two rows in the table. The first row contains 'Type 01' in the 'Code' column, 'Sample license type' in the 'Description' column, and checked boxes in the 'Required for Application' and 'Required for Purchase' columns. The second row is empty, with unchecked boxes in the 'Required for Application' and 'Required for Purchase' columns. The dialog box has a 'Save' button and an 'Undo' button. The status bar at the bottom shows 'Ready'.

Code	Description	Required for Application	Required for Purchase
Type 01	Sample license type	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
		<input type="checkbox"/>	<input type="checkbox"/>

6. Click the **Save** button.
