

How to Drill Down on Setup Panel

A user can set up panel to be drilled down once shown in the dashboard. The following steps can be a guide how to do so:

1. Create two panels, one is the **main panel (Master)** that will be displayed on the dashboard and the other one is the panel to be **drilled down (Subpanel)**. Take note that the panels that can only be selected from Drill Down field are panels whose Class is **Subpanel**.

Grid

The screenshot shows two panel settings windows. The left window is for 'Customers' and the right is for 'Customer Invoices'. Both panels are set to 'Grid' style. The 'Customers' panel has a 'Drill Down' field set to 'Customer Invoices'. The 'Customer Invoices' panel has a 'Drill Down' field set to 'None'. A red arrow points from the 'Drill Down' field in the 'Customers' panel to the 'Drill Down' field in the 'Customer Invoices' panel.

Chart

The screenshot shows two panel settings windows. The left window is for 'Invoices Chart' and the right is for 'Invoices Drill Down'. Both panels are set to 'Chart' style. The 'Invoices Chart' panel has a 'Drill Down' field set to 'Invoices Drill Down'. The 'Invoices Drill Down' panel has a 'Drill Down' field set to 'None'. A red arrow points from the 'Drill Down' field in the 'Invoices Chart' panel to the 'Drill Down' field in the 'Invoices Drill Down' panel.

2. Make sure that the second panel is selected on the **Drill Down** field and the same field is selected on the **Drill Down Column** field of the first panel like what is shown in the above screenshot.
 3. Once the first panel is placed on the dashboard, double click on the grid record to drill down the second panel.
